

# Connect with a complete office-in-a-box

HPE Solutions for Small Office Deployment

## Get what you need to succeed

When you're running a small to midsize business (SMB), you've got a lot on your mind. That's why you need an IT foundation that's simple to purchase, deploy, and manage—and works as expected.

For example, an on-site server with fast, secure Wi-Fi access and better application performance can enhance employee productivity. And a server that enables remote access to [on-premises](#) resources can empower employees to be productive working from home when it's needed, even unexpectedly.

Fast, on-site Wi-Fi connectivity can also help you connect customers with better experiences by enabling app-centric on-site interactions and empowering associates with information at their fingertips.

However, you may be holding off on a purchase decision because selecting, sizing, purchasing, deploying, managing, and supporting a server, storage, and Wi-Fi network seems like a complex, time-consuming undertaking. Not to mention the task of maintaining security in a Wi-Fi enabled network with no room for errors.

HPE Solutions for Small Office Deployment are complete, office-in-a-box IT solutions that take a simple approach to providing wired and wireless connectivity, running general business applications, and storing files. They even provide options for data backup and remote employee access.

## Solution brief

### HPE Flex Offers

Maximize your savings with HPE Flex Offers.

### iQuote Universal

Browse popular HPE server, storage, and networking products and [create fast, accurate configurations](#) that you can export to request a quote.

## Get more of everything

HPE Solutions for Small Office Deployment are based on HPE ProLiant servers with Aruba Instant-On wired and wireless networking and HPE StoreEasy storage, in configurations designed to improve employee experiences and productivity for up to 150 users. Optional RDX Removable Disk Backup System can be used for local backup. Or add Microsoft Remote Desktop Services (RDS) licensing to support up to 20 remote users.

These solutions enable:

- **Collaboration:** Enhance the way people and teams work together with on-site solutions that provide superior wireless connectivity and better application performance.
- **Control:** Keep data on-site for added security and control and to help conform to industry regulations regarding managing, controlling, and storing data.
- **Simplicity:** Make a quick and safe decision to adopt a solution that is simple to purchase, deploy, and manage—especially for small IT departments.

## Easily evolve to hybrid cloud

HPE Solutions for Small Office Deployment can be easily extended to hybrid cloud for additional disaster recovery options with cloud services from Microsoft Azure or a managed service provider.

## Connect more, sooner

HPE Solutions for Small Office Deployment let you focus on connecting with customers and employees—not IT. Contact your authorized HPE representative to find out more.
